5 FAQ

1. Configure the network in AP mode.

1. Reset the device in EZ pair mode, it will switch to AP pair mode. The indicator on your device will blink slowly.

2. Then switch the network configuration mode to AP mode at the upper right corner of the APP when you add the device.

3. Place the router, mobile phone and Pet Feeder as close as possible. Confirm the indicator on your device is slowly blink, then tap **"Next"** to wait for connection.
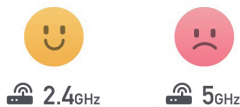

4. After the device has been added, you can use ✎ to rename the device. (If failed, please refer to FAQ2 to troubleshoot)

## 2. Wi-Fi configuration of the device failed
 - Confirm the entered router password is correct.
 - Ensure that the DHCP service is enabled for the router. If not, the IP address will be occupied.
 - Please confirm the Wi-Fi network is stable:
   Put the phone besides your device and make sure they are in the same network environment, try to open a website to judge if the network can be used.
 - If your router supports both 2.4Ghz and 5Ghz, please enable the 2.4Ghz channel and add device under 2.4G Wi-Fi channel. You can follow the following step on the App to configure the router.

Select 2.4 GHz Wi-Fi Network and enter password.

If your Wi-Fi is 5GHz, please set it to be 2.4GHz.
Common router setting method

📶 2.4GHz   📶 5GHz

 - Confirm that both the location permission of phone system and the App are enabled.
